

EDWARD ANTHONY ESCUDERO BOWIE

Senior Full-Stack Engineer | Technical Co-Founder | SaaS, AI Automation & Web3 Systems
Medellin, Colombia | kaytechventures@gmail.com | +57 3155122988 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Technical co-founder and senior full-stack engineer with 6+ years of experience building SaaS, AI automation, payments, and Web3 products across product strategy, architecture, backend services, frontend systems, integrations, deployment, and production operations. Trusted to lead technical execution across Foldly and NeverForget while delivering client and partner platforms including Memecoin.org by 9GAG, Parcero, Throu, Gunny Games, and Mango House. Highlights include 40% faster load times, 1,000+ daily Web3 transactions supported, \$1M+ in blockchain transaction volume, and \$50K+ in platform revenue generated after delivery.

TECHNICAL SKILLS

Architecture & Systems	System design, API architecture, data modeling, product architecture, background jobs, serverless workflows, security-conscious engineering
Product Engineering	SaaS platforms, AI automation, document ingestion, payment flows, supplier and fulfillment integrations, scraper and data pipelines, Web3 connectivity
Frontend	Next.js, React, TypeScript, Tailwind CSS, Vite, React Query, Zustand, Redux
Backend & Data	Node.js, PostgreSQL, Supabase, SQL migrations, RLS, Edge Functions, Drizzle ORM, MySQL, REST APIs, WebSockets
Cloud & Integrations	Vercel, Vercel v0, Clerk, Stripe, Mailgun, Gmail OAuth, Cloudflare R2, Upstash Redis, Inngest, Resend, Firecrawl
Web3	Reown AppKit, wagmi, ethers, Anchor, Solana web3.js, Polygon/EVM integrations

PROFESSIONAL EXPERIENCE

Technical Co-Founder & Head of Development | Foldly / NeverForget Feb 2025 - Present

Paid equity partnership | Remote

- Transitioned from successful Memecoin.org delivery into a paid equity partnership with the founder to lead development across Foldly, NeverForget, and future products.
- Foldly: built a production document-intake SaaS with anonymous and branded upload links, authenticated dashboards, AI-assisted document processing, email/Gmail ingestion, and large-file delivery workflows.
- Defined product architecture, data models, background-job strategy, auth boundaries, storage flows, and integration patterns across the platform.
- Improved reliability for secure external uploads, durable serverless processing, large downloads beyond platform limits, and fallback-oriented ingestion for encrypted, malformed, and image-only PDFs.
- NeverForget: built the production application foundation for onboarding, billing, AI gift recommendations, supplier integrations, notifications, delivery tracking, timed approvals, and fulfillment fallback behavior.
- Led implementation with operations and UI/UX collaborators, translating founder requirements into shipped product decisions, deployment, and production maintenance.

Stack: Next.js, TypeScript, PostgreSQL, Supabase, Drizzle ORM, Clerk, Stripe, Mailgun, Gmail OAuth, Upstash Redis, Cloudflare R2, Inngest, LLM APIs, Vercel

Products: foldly.com | never-forget-zeta.vercel.app

Web3 Frontend Engineer / Technical Lead | Memecoin.org by 9GAG Jan 2025 - Feb 2026

Full-time contract via RedValley | Remote

- Delivered Web3 application architecture supporting wallet connectivity, smart-contract interactions, and scalable transaction flows for 1,000+ daily transactions.
- Improved frontend performance by 40% through code-splitting, optimized data fetching, and targeted rendering/runtime improvements.
- Established core data models, contract-interaction patterns, and frontend foundations for transaction reliability and future product expansion.
- Built enough trust with founder stakeholders to be invited into a direct product partnership on Foldly and NeverForget.

Stack: Next.js, React, TypeScript, Node.js, Vite, Web3.js, smart-contract integrations

Platform: memecoin.org | by 9GAG

Senior Full-Stack Web Developer & AI Automation Engineer | Parcero Ltd. 2026

Project-based independent contract | 100% remote

- Revamped and hardened Team Around You / Community Connect, an existing listings and community-support platform, improving search, matched-location logic, admin workflows, privacy, SEO, scraper reliability, and data quality.
- Contributed to Parcero's main website and related product surfaces through production fixes, integrations, frontend polish, and backend/platform improvements across multiple projects.
- Guided part of the team from ad hoc Lovable-based workflows to a more reliable Vercel v0 plus Git-based delivery model, improving traceability, preview review, and deployment discipline.
- Configured Vercel database integrations and environment governance across projects, centralizing sensitive configuration in Vercel project settings with separate development and production scopes.
- Optimized scraper and AI-assisted data-enrichment pipelines, cleanup scripts, rescrape flows, and platform workflows for better listing data quality, safer remediation, and more reliable launch operations.

Stack: React, TypeScript, Vite, Supabase, PostgreSQL, SQL migrations, RLS, Edge Functions, Vercel, Vercel v0, Firecrawl, Tailwind CSS, React Query

Head of Development & CTO Throu S.A.S <i>Part-time contract Remote</i> - Co-founded and delivered the application platform across public product pages, marketplace/project detail flows, authenticated investor dashboards, portfolio views, multilingual UX, and wallet-connected investment flows. - Implemented the Polygon/EVM contract-integration layer and helped ship a multichain EVM/Solana architecture with wallet flows and Anchor-based Solana support. - Supported product delivery that generated \$50K+ in platform revenue after launch. Stack: Next.js, TypeScript, Clerk, next-intl, Reown AppKit, wagmi, ethers, Anchor, Solana web3.js, Polygon/EVM integrations Platform: throu.app	Mar 2022 - Jan 2026
Web Developer Gunny Games <i>Freelance contract Remote</i> - Built a gamified platform with token-based rewards serving 600+ active users and blockchain-powered progression. - Improved load speed by 35% through performance audits, refactoring, database optimization, and real-time reward implementation. Stack: Next.js, TypeScript, Node.js, Web3, performance optimization	Nov 2023 - Nov 2024
Web Developer Mango House <i>Freelance contract Remote</i> - Built a booking platform handling 80+ daily reservations with integrated payments and third-party service workflows. - Improved booking speed by 25% through API optimization, database indexing, and streamlined workflows. Stack: React, Node.js, Express, MySQL, RESTful APIs	Jan 2022 - Dec 2023
Unity Developer La Panqueria <i>Freelance contract Remote</i> Developed a cross-platform mobile app in Unity/C# focused on brand engagement and customer interaction. Stack: Unity, C#, mobile development, UI/UX design	Jan 2021 - Dec 2022

EDUCATION

B.S. in Systems Engineering | Universidad de Medellín, Colombia | Dec 2025
Coursework: Data Structures & Algorithms, Database Design, Software Architecture, Distributed Systems

CERTIFICATIONS

IBM: Databases and SQL for Data Science with Python (2023)
Ruta N Innovation Marathon Participant (2023)
Gunny Games Technical Excellence Certificate (2024)

ADDITIONAL INFORMATION

Languages: English (Fluent), Spanish (Native), Jamaican Patois (Native) | Availability: Open to full-time, contract, and consulting
